

Waste Sorting Guide

It is not always easy to know how to sort different types of waste. Even if a large part of your waste can now go into your new multi-compartment bin, you must not put all your waste into that bin. This Waste Sorting Guide will guide you through the different types of waste and sorting methods. By sorting and recycling your waste, you protect yourself and others from hazardous substances while reducing the consumption of valuable natural resources.

Ahla Recycling Centre can be found at Ahla 205 (three km east of Laholm, along the road to Skogaby), telephone No.: 0430 151 38. www.laholm.se/atervinningscentralen

Hazardous waste cabinets (small-size packages and volumes) can be found at Mellby Center, ICA Våxtorp, Coop Knäred and by the entrance to Laholm Town Hall. Bulky waste is domestic waste that is too big for your usual bin collection. Bulky waste does not include construction and hazardous waste. Your waste collection subscription includes six collections of bulky waste per year and household with a limit of 10 packages per collection (each package must be small enough for one person to handle/carry). Waste collections from your property are carried out in accordance with a fixed weekly schedule. For more information about waste collections in your area, visit www.laholm.se/kallsortering. To book a collection of bulky waste, please call 0430 153 42.
